

Globbering and Export statement

1) Write a Bash script to do all operations discussed under Globbering

The screenshot shows a code editor window with the title 'globbing.sh' and a '~/' icon. The editor contains the following text:

```
1 #!/bin/bash
2
3 ls example?
4 ls [aA]*.sh
5 ls [^a-d]*.sh
6 ls *.txt
```

The screenshot shows a terminal window with the prompt 'harsh@harsh:~\$'. The user has entered './globbing.sh' and the output is displayed as follows:

```
harsh@harsh:~$ ./globbing.sh
example1 example2 example3 example4 example5
add.sh assignment14_1.sh assignment14_2.sh
globbing.sh g_variable.sh l_variable.sh raed.sh
def.txt exercise.txt ghi.txt names.txt numbers1.txt numbers.txt test.txt
```
