

Advance topics in a function

1) Write a function add to add two numbers and call the function in another file.

ANS:

```
GNU nano 6.2 add1.sh
#!/usr/bin/env bash

add(){
a=$1
b=$2
c=$((a+b))
echo $c
}
```

```
GNU nano 6.2 functions4.sh
#!/usr/bin/env bash
source 'add1.sh'

add 1 2
add 2 3
add 3 4
```

```
harsh@harsh:~$ chmod +x functions4.sh
harsh@harsh:~$ ./functions4.sh
3
5
7
harsh@harsh:~$
```
